(54) Title: ELECTRONIC PAYMENT OF CONTENT

(57) Abstract: The present invention relates to a method for a receiving device operated by a buyer of performing payment of content to be received from a transmitting device operated by a seller, said method comprises the steps of: setting up a private communication channel between said receiving device and said transmitting device, transmitting a payment container to said transmitting device using said private communication channel, said payment container comprising information authorizing the seller to receive the payment from the buyer's bank, receiving said content from said transmitting device based on the arrival of said payment container at said transmitting device. Thereby secure and convenient payment from consumer to consumer or consumer to business is provided, even if no permanent far-range connection to a trust centre or transaction manager is available.
